*The WMS Deluxe Monitor (91600) is a versatile portable battery powered bed and chair alarm designed for use with either a bed or chair sensor pad. The WMS Deluxe Monitor sounds an alarm when the patient's weight moves off the bed or chair sensor pad. The monitor also offers an alarm output which allows for connection to most nurse call systems when used with the optional Nurse Call Cable.*

*A silent bed side alarm option is available when connected to a nurse call system. An optional plug-in power adapter is also available giving you battery or mains power options. This versatile high quality bed and chair alarm system is less than half the price of leading competitive models giving you an affordable tool for helping to manage fall risk patients and residents in your care.*
